DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul D. Greeley on October 23, 2003.

Abstract amended as follows:

An electro-modulating device for modulating light from a light source, as part of an opto-electronic communication network has a modulating medium for modulating light passing therethrough by varying an electric field applied across the modulating medium, an optical input-output surface, a light reflector, and electrodes for applying the varying electric field across the modulating medium. The electric field is transverse to light traversing the medium between the input-output surface and the reflector, to make it easier to couple an optic fiber to the input-output surface of the modulating medium.

Allowable Subject Matter

2. Claims 3 – 20 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in a combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 6, 10, and 15, for example which include a modulating element is formed from a section of semiconductor wafer and the modulating medium is formed from an active layer or in the semiconductor wafer, the active layer has having a plurality of edges and the input-output surface on an edge of the active layer and the modulating medium is formed from a layer of an InGaAsP and each electrode is formed from a layer of conducting InP and a silicon mounting surface having a V – groove etched thereon for receiving an end portion of an optic fiber.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
